

RE:SINCLAIR BROADCASTING...ordering all its stations to air anti-Kerry documentary near the end of a highly contested election campaign without giving equal time to the other side. This is frightening and should raise even more of your concern about the growth of Media Conglomerates. It is an example of the abuse of the privilege of using the public airways at no cost and with no clear regulation. How can a free press and our democratic values of fair play survive when one corporate entity can takesuch partisan ,dictatorial actions? And where is the consent of the local community? Please act to strengthn media ownership rules to ensure that each entity is carefully scrutinized before their license can be renewed. Thank you.
